The Port of the Future™

Port of Long Beach • Climate Week NYC 2026

Hosted by Long Beach Mayor Rex Richardson

Join the Port of Long Beach for an exclusive conversation about the future of global trade. As international supply chains evolve, ports must become more than gateways for cargo, serving as engines of innovation, clean energy and economic opportunity.

Learn more about new CEO Dr. Noel Hacegaba's bold vision to build the Port of the Future™, doubling cargo to 20 million container units annually by 2050 while becoming the world's first zero-emissions port along the way.

Event Highlights

Milestone Achievements: A review of the Port's success in reducing air pollution by more than 90% and advancing toward zero-emissions operations.

The Future of Pier Wind: Updates on California's premier offshore wind staging and integration facility and its role in meeting state and federal energy goals.

Energy Resiliency: Learn how small modular reactor technology can support the Port's strategy to develop a diverse portfolio of carbon-free energy sources as demand increases.
