

Agenda

As the core of Climate Week NYC, The Hub Live events program is the primary way for businesses, governments, and climate stakeholders to engage. For 2021, the events program is organized into five themes:

Energy & Transport

The clean energy and transport revolution is here. Responsible for two-thirds of GHG emissions, energy is the largest polluting sector globally. With the transport sector now the fastest-growing contributor to climate change and accounting for almost a quarter of emissions, necessary measures and actions must be taken in order to halve global emissions by the next decade.

Finance

The shift to a low carbon economy can spark an economic boost and create millions of jobs which is more important now than ever as countries and cities work to rebuild from the global pandemic. The finance stream focuses on financial opportunities to identify and mitigate climate risks as part of a green recovery. It provides a lens to explore initiatives and roadmaps for the public and private financial sector to tackle climate change and discuss sustainable development.

Built Environment & Industry

Buildings represent nearly 40% of greenhouse gas emissions and a third of global energy demand, which is why it's crucial to aim for net-zero buildings powered by renewable energy. Cement and steelmaking are also some of the biggest emitters of carbon emissions globally, with plastics and aluminium following closely behind. This stream explores the impact heavy industry, buildings and infrastructure have on climate and how we can use a circular economy to reduce CO2 emissions.

Emerging Trends

So many of the solutions and innovations that can help us halve emissions by 2030 are with us today, we just don't know it yet. As we start a recovery from a pandemic that has proved the ability of humans to create change when it's needed, the Emerging Trends stream will bring together those at the forefront of future trends. Exploring exclusive insights from the world's biggest brands and discussing new global innovations from the people that created them, this series of events will provide an essential guide to what climate action will look like over the next decade.

Food & Health

The global food system currently contributes to 21-37% of total GHG emissions, and even then, agriculture's contribution to climate change is underestimated. Land-based ecosystems and regenerative strategies are critical to the climate conversation. This stream examines the threats climate change has on our food system and how these trends impact our health from food and water shortages to the declining nutritional value of food. It will also look at climate health and how land use effects pandemics.

Agenda – Tuesday, September 21

for zere emission vehicles (ZEV)s is getting closer as businesses, goverments, cities, states and regions around the world push forward multicus commitments. But these pockets of leadership are not enough to win the race to zero - more needs to be done and faster.members With COP26 round the corner and clean road transport one of its key themes, this high-level plenary session will showcase the highest levels of global ambition. Featuring contributions from international political and corporate leaders, this event will: Explore the technological and financial innovations helping to accelerate uptake of zero emission vehicles Showcase real-world discuss the opportunities for driving a just transition in the automotive industry Speakers Björn Annwall, CFO, Volvo Cars Monica Arzya, Drive Electric Campaigner, ClimateWorks Foundation Shorab Burrow, General Scerctary, International Trade Unition Confederation Robin Carnahan, Administrator, US General Services Administration Benoit Charette, Minister of the Environment and the Fight against Climate Change, Québec Government Hele Clarkson, CEO, Climate Group Nicolás Estuplian, Secretary Of Mobility, Begotá Government Sharab Burro, Addonin, Jka Services IN(KA) Angela Hultberg, Transport Lead, UN Climate Chanpions Christian Levin, CEO & President, Scania Berodd Mallory, Chair, US Council on Environmental Quality Meryam Omi, Head of Sustainability & Responsible Investment Strategy, Legal & General Investment Management Michael Regan, Administrator, US Environmental Protection Agency Sandra Robing, Head of Transport, Climate Group Theodor Swedgiemark, Chief Communications & Sustainability Officer, ABB Keees van der Burg, Director General of Mobili	7.00 EDT	Could 2021 be the beginning of the end for the internal combustion engine? In a pivotal year for climate action, the tipping point for zero emission vehicles (ZEVs) is getting closer as businesses, governments, cities, states and regions around the world push forward ambitious commitments. But these pockets of leadership are not enough to win the race to zero – more needs to be done and faster.members

	Driving Co-Benefits For Climate And Health: How private sector action can accelerate progress		
	A healthy planet is the foundation for a healthy global population, and human health cannot be advanced without healthy planetary systems such as fresh water, clean air and a stable climate. The direct yearly financial costs of degrading natural systems are predicted to be US\$2-4 billion by 2030. And yet, there is currently a lack of guidance for businesses on how to leverage their strategies in a way that simultaneously accelerates change across both climate change and public health.		
	To bridge this gap, Forum for the Future, in collaboration with Walgreen Boots Alliance, GSK Consumer Healthcare and Bupa has over 2020-21 explored the interconnection of these critical challenges and how businesses can take action. Join this event to explore:		
	 What are the interconnections of climate and health? How might they strengthen in the 2020s? How can businesses deliver positive outcomes for both issues through supply chain strategies, products and services, advocacy, and partnerships? What opportunities exist for cross-sector collaboration to consider how to drive co-benefits on two of today's biggest global 		
	challenges?		
Speakers	 Jane Burston, Executive Director, Clean Air Fund Richard Ellis, VP, Corporate Social Responsibility, Walgreens Boots Alliance Dr Paula Franklin, Chief Medical Officer, Bupa 		
	 Dr Teri Lyng, Sr VP, Head of Transformation & Sustainability, GSK Consumer Healthcare Dr Sally Uren, CEO, Forum for the Future 		
2.30 - 3.00 EDT	Networking – Driving Co-Benefits For Climate And Health Network with your peers and debate the important topics that were raised in the previous session.		
3.00 - 4.00 EDT	Transformation Of Transport And Energy By 2040 Or Sooner		
	This event, hosted by The Climate Pledge, will bring together companies across the energy and transportation sectors to discus how they are committed to decarbonizing their own operations, while also enabling others to transition to net-zero carbon emissions by 2040 or sooner. The Climate Pledge is a commitment co-founded by Amazon and Global Optimism, which seeks to encourage organizations to take climate action, and accelerate their goals, plans, and programs to directly address the urgency of climate change and make a difference. Hear from leading companies in their sector on how they're advancing their decarbonization goals through collaboration and joint action under The Climate Pledge.		
Speakers	 Jakob Askou Bøss, Senior VP, Ørsted Kara Hurst, VP of Worldwide Sustainability, Amazon Ellen Jackowski, Chief Impact Officer and Head of Sustainable Impact, HP Andrew Macdonald, Senior VP of Mobility & Business Operations, Uber 		
	 Nicola Peill-Moelter, Head of Sustainability Innovation, VMware Andrew Savage, VP of Sustainability, Lime Matthias Rebellius, Member of the Managing Board of Siemens AG and CEO Smart Infrastructure 		
4.00 – 4.30 EDT	Network with your peers and debate the important topics that were raised in the previous session.		

Agenda – Wednesday, September 22

10.00 - 11.30 EDT Green Jobs In The Clean Energy Transition

The transition to 100% clean energy by 2030 - an historical commitment by the Biden Administration with the potential to create over 10 million green, well paid and skilled jobs.

From construction to transport, manufacturing to industry, green jobs will continue to grow and with greater business and government collaboration increasing the demand for green jobs, has the potential to transform the American energy economy and secure a future for key American industries – but only if people and communities are placed at the heart of this transition.

The Hub Live presents a 90-minute examination of Biden's jobs and energy vision exploring how the transition can benefit all Americans, why it is so critical to other sectoral transitions, and how to build the level of capacity – both infrastructure and skills – required to deliver a new energy economy.

As part of this event, delegates will be invited to 'Meet the Speakers' in our networking lounge, where there'll be opportunities to join live discussions and put your questions to the speakers.

Speakers • Chris Ashton, CEO, Worley

- Sophie Brochu, President & CEO, Hydro-Québec
- Mary Burce Warlick, Deputy Director General, International Energy Agency
- Kate Brown, Governor, State of Oregon
- Helen Clarkson, CEO, Climate Group
- Megan Darby, Editor, Climate Home News
- Ani Dasgupta, CEO & President, World Resources Institute
- Secretary Jennifer Granholm, Secretary, US Department of Energy
- Secretary Deb Haaland, Secretary, US Department of the Interior
- SRSG Damilola Ogunbiyi, CEO & Special Representative of the UN Secretary-General for Sustainable Energy for All & Co-Chair of UN-Energy, Sustainable Energy for All (SEforALL)
- Pedro J. Pizarro, CEO, Edison International
- Basil Seggos, Commissioner, New York Department of Environment and Conservation
- James Slevin, National President, Utility Workers Union of America
- Frans Timmermans, Executive VP, European Commission
- Halla Tómasdóttir, CEO & Chief Change Catalyst, B-Team
- 11.30 12.00 EDT Green Jobs In The Clean Energy Transition: Networking

Network with your peers and debate the important topics that were raised in the previous session.

11.30 – 12.30 EDT ZEV Community Virtual Tour: Scottish Zero Emission Vehicle Innovation

This event is a live virtual visit of the Michelin Scotland Innovation Parc (MSIP) hosted by the Climate Group's ZEV (Zero Emission Vehicle) Community. MSIP is an ambitious joint venture between Michelin, Dundee City Council, and Scottish Enterprise, created to generate economic growth in Scotland and support a fair and just transition to a net zero economy. We'll take you on a virtual visit of the site to showcase some of the innovative transport projects currently in development, such as:

- MSIP Skills Academy
- Train, bus and refuse collection vehicle conversions to Hydrogen Fuel Cell (HFC)

Speakers	 The design and development of bespoke battery solutions for demanding transport applications The ZEV Community is a peer learning project co-hosted by the Under2 Coalition and the ZEV Alliance, in partnership with C40 Cities and the U.S. Climate Alliance. It brings together all levels of government to share and learn about exciting ZEV initiatives taking place around the world and aims to accelerate the uptake of zero emission vehicles through sharing policy insights, exchanging best practice and profiling government leadership. Jim Brown, Strategic Projects Partner, Dundee & Angus College (MSIP Academy) Greig Coull, CEO, Michelin Scotland Innovation Parc (MSIP) Graeme Dey, Scottish Government Minister for Transport Stuart Morrison, Managing Director, MEP Technologies Ltd Anaísa Pinto, Policy Manager, Under2 Coalition, Climate Group Dr Ben Todd, CEO, Arcola Energy
12.00 - 1.15 EDT	Fast Tracking Finance: The crucial role of investors and financers in the Climate Decade The renewed US domestic climate agenda will drive demand for green innovation and investments with new approaches to scaling up finance for climate-aligned sectors and infrastructure. According to a recent Princeton University study, Net Zero America, in order for the United States to achieve net zero greenhouse gas emissions economy wide by 2050 it would require at least \$2.5 trillion in upfront additional capital investment over the next decade. Yet, the cost for inaction and the impact on the environment, human health and the economy is immeasurable. What the broader financial community does now will help determine the fate of the planet on which humanity relies. This session will explore the innovations and pathways needed for the financial system to accelerate investments toward a zero-carbon economy.
Speakers	 Michael Cappucci, Managing Director, Compliance & Sustainable Investing, Harvard Management Company Amy Davidsen, Executive Director, North America, Climate Group Jonah Goldman, Managing Director, Breakthrough Energy Alexandra Liftman, Global Environmental Executive, Bank of America Mindy Lubber, CEO & President, CERES Susan Mac Cormac, Partner, Morrison & Forester, LLP Fiona Reynolds, CEO, Principles for Responsible Investment (PRI) Jigar Shah, Director, Loan Programs Office, US Department of Energy Anne Simpson, Managing Investment Director, Board Governance & Sustainability, CalPERS Dr Andrew Steer, CEO & President, Bezos Earth Fund Tom Steyer, Co-Founder, Galvanize Climate Solutions Jason Storah, CEO, Aviva Canada Marilyn Waite, Managing Director, Climate Finance Fund
1.15 - 1.30 EDT	Networking – Fast Tracking Finance Network with your peers and debate the important topics that were raised in the previous session.
1.30 - 2.30 EDT	Developing the Hydrogen Economy: A vision for New York Hydrogen has significant potential to help decarbonize multiple sectors, including power generation, transportation and heating. As a zero carbon fuel, hydrogen can also play a critical role in providing long duration storage, helping to balance renewable supply with demand, while maintaining reliability and resiliency. As increasing amounts of offshore wind energy come into New York, green hydrogen production can be powered by excess renewables, storing that energy for hours when the wind is not blowing. Join us to hear about the role hydrogen can play in decarbonizing New York and what it will take to develop the hydrogen economy.
Speakers	• Dr Julio Friedmann, Senior Research Scholar, Center on Global Energy Policy at Columbia University

Agenda – Thursday, September 23

6.00 - 7.00 EDT	East Asia Energy Transition: Unlocking a renowables been		
6.00 - 7.00 EDT	East Asia Energy Transition: Unlocking a renewables boom Despite the rise of leading manufacturers of clean technology products, East Asian markets, such as the South Korea and Taiwanese markets, have historically been the lowest users of green energy among developed countries. Yet this year has seen a huge shift – nations unveiling net zero carbon commitments, interest in market reform, green growth strategies and attracting record-breaking investments that rival seasoned renewable energy market leaders, such as China.		
	Is East Asia realizing it's potential to be a global clean energy powerhouse?		
	This event will cover:		
	 The direction and pace of East Asia's energy transition and regional investment trends Leaders' plans to turn climate pledges into energy sector action The continued need to make private investment easier – through improved, stable regulatory frameworks The importance of renewables for countries remaining competitive, stimulating economic growth and phasing out coal The role of business, regional governments and wider society 		
Speakers	 Matthias Bausenwein, President, Ørsted Asia Pacific Katherine Dixon, Chief Counsellor, Transitions & Partnerships, International Energy Agency (IEA) Aleksandra Klassen, Senior Impact Manager RE100, Climate Group Kahori Miyake, Co-Chairman, Japan Climate Leaders' Partnerships (JCLP) & CSO, AEON Co., Ltd. Ken O'Flaherty, COP26 Regional Ambassador to Asia-Pacific, UK COP26 Unit Yang Seung-Jo, Governor of Chungnam Leo Wirawan, Senior Lead, Energy Strategy & Global Infrastructure, Google Yang Seung-ho, Assistant VP, Head of Energy Strategy Team, KEPCO 		
7.00 - 7.30 EDT	Networking – East Asia Energy Transition Network with your peers and debate the important topics that were raised in the previous session.		
7.30 - 8.45 EDT	India's Road To COP26: The power of influence to mobilize business action This event will bring together critical influencers from government, corporate and wider society to examine how Indian businesses can take greater climate action.		
	As the world's third-largest carbon emitter, India has a pivotal role to play in the global response to the climate emergency and the corporate community will be instrumental in this journey. More businesses in India are demonstrating their readiness to lead and invest. But far more still need to raise their ambition.		
	Bringing together prominent figures in Indian business, policy and activism, we'll discuss how best to influence Indian corporates to take up the huge opportunities now available in renewables, electric vehicles and efficient, decarbonized industry.		
Speakers	 Seema Arora, Deputy Director General, Confederation of Indian Industry Helen Clarkson, CEO, Climate Group
