

Agenda

As the core of Climate Week NYC, The Hub Live events program is the primary way for businesses, governments, and climate stakeholders to engage. For 2021, the events program is organized into five themes:

Energy & Transport

The clean energy and transport revolution is here. Responsible for two-thirds of GHG emissions, energy is the largest polluting sector globally. With the transport sector now the fastest-growing contributor to climate change and accounting for almost a quarter of emissions, necessary measures and actions must be taken in order to halve global emissions by the next decade.

Finance

The shift to a low carbon economy can spark an economic boost and create millions of jobs which is more important now than ever as countries and cities work to rebuild from the global pandemic. The finance stream focuses on financial opportunities to identify and mitigate climate risks as part of a green recovery. It provides a lens to explore initiatives and roadmaps for the public and private financial sector to tackle climate change and discuss sustainable development.

Built Environment & Industry

Buildings represent nearly 40% of greenhouse gas emissions and a third of global energy demand, which is why it's crucial to aim for net-zero buildings powered by renewable energy. Cement and steelmaking are also some of the biggest emitters of carbon emissions globally, with plastics and aluminium following closely behind. This stream explores the impact heavy industry, buildings and infrastructure have on climate and how we can use a circular economy to reduce CO2 emissions.

Emerging Trends

So many of the solutions and innovations that can help us halve emissions by 2030 are with us today, we just don't know it yet. As we start a recovery from a pandemic that has proved the ability of humans to create change when it's needed, the Emerging Trends stream will bring together those at the forefront of future trends. Exploring exclusive insights from the world's biggest brands and discussing new global innovations from the people that created them, this series of events will provide an essential guide to what climate action will look like over the next decade.

Food & Health

The global food system currently contributes to 21-37% of total GHG emissions, and even then, agriculture's contribution to climate change is underestimated. Land-based ecosystems and regenerative strategies are critical to the climate conversation. This stream examines the threats climate change has on our food system and how these trends impact our health from food and water shortages to the declining nutritional value of food. It will also look at climate health and how land use effects pandemics.

Agenda – Tuesday, September 21

7.00 EDT	Event platform live Log into the event platform, build your agenda and network with your peers				
8.00 - 9.20 EDT	RouteZero: COP26 and the race to zero emission vehicles Could 2021 be the beginning of the end for the internal combustion engine? In a pivotal year for climate action, the tipping point for zero emission vehicles (ZEVs) is getting closer as businesses, governments, cities, states and regions around the world push forward ambitious commitments. But these pockets of leadership are not enough to win the race to zero – more needs to be done and faster.members With COP26 round the corner and clean road transport one of its key themes, this high-level plenary session will showcase the highest levels of global ambition. Featuring contributions from international political and corporate leaders, this event will: • Explore the technological and financial innovations helping to accelerate uptake of zero emission vehicles				
	 Showcase real-world examples of inspiring leadership from around the world on clean road transport Identify and discuss the opportunities for driving a just transition in the automotive industry 				
Speakers	 Björn Annwall, CFO, Volvo Cars Monica Araya, Drive Electric Campaigner, ClimateWorks Foundation Sharan Burrow, General Secretary, International Trade Union Confederation Robin Carnahan, Administrator, US General Services Administration Benoît Charette, Minister of the Environment and the Fight against Climate Change, Québec Government Helen Clarkson, CEO, Climate Group Nicolás Estupiñan, Secretary of Mobility, Bogotá Government Pia Heidenmark Cook, Senior Advisor, Ingka Services (IKEA) Angela Hultberg, Transport Lead, UN Climate Champions Christian Levin, CEO & President, Scania Brenda Mallory, Chair, US Council on Environmental Quality Meryam Omi, Head of Sustainability & Responsible Investment Strategy, Legal & General Investment Management MichaelRegan, Administrator, US Environmental Protection Agency Sandra Roling, Head of Transport, Climate Group Theodor Swedjemark, Chief Communications & Sustainability Officer, ABB Kees van der Burg, Director General of Mobility, Netherlands Government 				
9.20 - 9.50 EDT	RouteZero: Networking Network with your peers and debate the important topics that were raised in the previous session.				
10.00 - 11.30 EDT	 O0 - 11.30 EDT Getting It Done: Critical moments in the Climate Decade and how to get there Global business and government leaders have announced ambitious climate commitments, laying out targets with fast approaching end dates. 'Net Zero' will define our politics and economies for decades to come, from energy to transport, ind to food, the opportunities are endless, and the risks of inaction are profound. But despite our ambitions and actions so far, despite the science setting us targets, and knowing we must halve emissions by 2030, all trajectories suggest we are vastly off track to meet all the commitments made. We need greater leadership in this Climate Decade. Many of the technologies, the tools and the pathways to deliver these targets are available, right now. Growth in the green economy will continue to outpace traditional sectors and we can rebalance our relationship with nature, but only if governm take urgent policy decisions and greater business action starts today. 				
Energy & Trai	nsport — Emerging Trends #ClimateWeekNYC ClimateWeekNYC.org — Food & Health				

Built Environment & Industry

	The Hub Live's opening flagship event will explore what needs to happen now to make 2030 and 2050 commitments a reality. How do we get back on track, what critical policy interventions, technology development and investment decisions must converge, and when do key climate millstones need to be hit across the Climate Decade to Get It Done?
Speakers	 Inger Anderson, Executive Director, United Nations Environment Programme (UNEP) Ezgi Barcenas, CSO, AB InBev Dr Fatih Birol, Executive Director, International Energy Agency (IEA) Helen Clarkson, CEO, Climate Group Dr Jonathan Foley, Executive Director, Project Drawdown Bill Gates, Founder, Breakthrough Energy Simon Glynn, Partner & Co-lead, Climate & Sustainability, Oliver Wyman Aongus Hegarty, President, International Markets, Dell Technologies Secretary John Kerry, US Special Presidential Envoy for Climate Catherine MacGregor, CEO, ENGIE Nisha Pillai, Event Host, Former BBC World News Anchor Rt Hon Nicola Sturgeon MSP, First Minister, Scottish Government Judith Wiese, Managing Board Member & Labor Director, Siemens AG
11.30 - 12.00 EDT	Getting It Done: Networking Network with your peers and debate the important topics that were raised in the previous session.
12.00 - 1.00 EDT Speakers	 Demanding Net Zero Industry Industrial materials have long been the thorn in the side of net zero ambitions. But if we stand a chance of halving emission by 2030, we must take urgent action and quickly strike the balance between supply and demand. Large consumers of industrial products like steel, cement and copper from the automotive, construction, engineering and renewable energy sectors are accelerating demand for zero carbon materials driven by supply chain pressures and the business case for taking climate action now. With emerging breakthrough technologies, this shift in demand, and greater collaboration across value chains, net zero by 2050 in some of the hardest to abate industries can become a reality, but only if business acts today. The Hub Live explores why demand signals are critical especially for the net-zero transition for heavy industry. This session brings together key influencers to discuss the business case for net zero industrial products and stakeholders from across the steel value chain to explore challenges and solutions in making and purchasing net zero steel. Laurent Chokoualé Datou, VP Public Affairs, International Copper Association Faustine Delasalle, Executive Director, Energy Transition Commission & Co-Executive Director, Mission Possible Partnership Cate Harris, Group Head of Sustainability & Lendlease Foundation, Lendlease Anne-Claire Howard, CEO, ResponsibleSteel Mike Peirce, Director of Corporate Partnerships, Climate Group Ralf Pfitzner, Global Head of Sustainability, Volkswagen AG Madhulika Sharma, Chief Corporate Sustainability, Tata Steel Limited
1.00 - 1.30 EDT	Networking - Demanding Net Zero Industry Network with your peers and debate the important topics that were raised in the previous session.
1.30 - 2.30 EDT	Driving Co-Benefits For Climate And Health: How private sector action can accelerate progress A healthy planet is the foundation for a healthy global population, and human health cannot be advanced without healthy planetary systems such as fresh water, clean air and a stable climate. The direct yearly financial costs of degrading natural

10.00 - 11.30 EDT Green Jobs In The Clean Energy Transition

The transition to 100% clean energy by 2030 - an historical commitment by the Biden Administration with the potential to create over 10 million green, well paid and skilled jobs.

From construction to transport, manufacturing to industry, green jobs will continue to grow and with greater business and government collaboration increasing the demand for green jobs, has the potential to transform the American energy economy and secure a future for key American industries – but only if people and communities are placed at the heart of this transition.

The Hub Live presents a 90-minute examination of Biden's jobs and energy vision exploring how the transition can benefit all Americans, why it is so critical to other sectoral transitions, and how to build the level of capacity – both infrastructure and skills – required to deliver a new energy economy.

As part of this event, delegates will be invited to 'Meet the Speakers' in our networking lounge, where there'll be opportunities to join live discussions and put your questions to the speakers.

Speakers • Chris Ashton, CEO, Worley

- Sophie Brochu, President & CEO, Hydro-Québec
- Mary Burce Warlick, Deputy Director General, International Energy Agency
- Kate Brown, Governor, State of Oregon
- Helen Clarkson, CEO, Climate Group
- Megan Darby, Editor, Climate Home News
- Ani Dasgupta, CEO & President, World Resources Institute
- Secretary Jennifer Granholm, Secretary, US Department of Energy
- Secretary Deb Haaland, Secretary, US Department of the Interior
- SRSG Damilola Ogunbiyi, CEO & Special Representative of the UN Secretary-General for Sustainable Energy for All & Co-Chair of UN-Energy, Sustainable Energy for All (SEforALL)
- Pedro J. Pizarro, CEO, Edison International
- Basil Seggos, Commissioner, New York Department of Environment and Conservation
- James Slevin, National President, Utility Workers Union of America
- Frans Timmermans, Executive VP, European Commission
- Halla Tómasdóttir, CEO & Chief Change Catalyst, B-Team
- 11.30 12.00 EDT Green Jobs In The Clean Energy Transition: Networking

Network with your peers and debate the important topics that were raised in the previous session.

11.30 – 12.30 EDT ZEV Community Virtual Tour: Scottish Zero Emission Vehicle Innovation

This event is a live virtual visit of the Michelin Scotland Innovation Parc (MSIP) hosted by the Climate Group's ZEV (Zero Emission Vehicle) Community. MSIP is an ambitious joint venture between Michelin, Dundee City Council, and Scottish Enterprise, created to generate economic growth in Scotland and support a fair and just transition to a net zero economy. We'll take you on a virtual visit of the site to showcase some of the innovative transport projects currently in development, such as:

- MSIP Skills Academy
- Train, bus and refuse collection vehicle conversions to Hydrogen Fuel Cell (HFC)

Speakers	 The design and development of bespoke battery solutions for demanding transport applications The ZEV Community is a peer learning project co-hosted by the Under2 Coalition and the ZEV Alliance, in partner Cities and the U.S. Climate Alliance. It brings together all levels of government to share and learn about exciting 2 taking place around the world and aims to accelerate the uptake of zero emission vehicles through sharing policy exchanging best practice and profiling government leadership. Jim Brown, Strategic Projects Partner, Dundee & Angus College (MSIP Academy) Greig Coull, CEO, Michelin Scotland Innovation Parc (MSIP) Graeme Dey, Scottish Government Minister for Transport Stuart Morrison, Managing Director, MEP Technologies Ltd Anaísa Pinto, Policy Manager, Under2 Coalition, Climate Group Dr Ben Todd, CEO, Arcola Energy 	ZEV initiatives	
12.00 - 1.15 EDT	Fast Tracking Finance: The crucial role of investors and financers in the Climate Decade The renewed US domestic climate agenda will drive demand for green innovation and investments with new app scaling up finance for climate-aligned sectors and infrastructure. According to a recent Princeton University study America, in order for the United States to achieve net zero greenhouse gas emissions economy wide by 2050 it w at least \$2.5 trillion in upfront additional capital investment over the next decade. Yet, the cost for inaction and t the environment, human health and the economy is immeasurable. What the broader financial community does determine the fate of the planet on which humanity relies. This session will explore the innovations and pathway the financial system to accelerate investments toward a zero-carbon economy.	y, Net Zero vould require the impact on now will help	
Speakers	 Michael Cappucci, Managing Director, Compliance & Sustainable Investing, Harvard Management Company Amy Davidsen, Executive Director, North America, Climate Group Jonah Goldman, Managing Director, Breakthrough Energy Alexandra Liftman, Global Environmental Executive, Bank of America Mindy Lubber, CEO & President, CERES Susan Mac Cormac, Partner, Morrison & Forester, LLP Fiona Reynolds, CEO, Principles for Responsible Investment (PRI) Jigar Shah, Director, Loan Programs Office, US Department of Energy Anne Simpson, Managing Investment Director, Board Governance & Sustainability, CalPERS Dr Andrew Steer, CEO & President, Bezos Earth Fund Tom Steyer, Co-Founder, Galvanize Climate Solutions Jason Storah, CEO, Aviva Canada Marilyn Waite, Managing Director, Climate Finance Fund 		
1.15 - 1.30 EDT	Networking – Fast Tracking Finance Network with your peers and debate the important topics that were raised in the previous session.		
1.30 - 2.30 EDT	Developing the Hydrogen Economy: A vision for New York Hydrogen has significant potential to help decarbonize multiple sectors, including power generation, transportation and heating. As a zero carbon fuel, hydrogen can also play a critical role in providing long duration storage, helping to balance renewable supply with demand, while maintaining reliability and resiliency. As increasing amounts of offshore wind energy come into New York, green hydrogen production can be powered by excess renewables, storing that energy for hours when the wind is not blowing. Join us to hear about the role hydrogen can play in decarbonizing New York and what it will take to develop the hydrogen economy.		
Speakers	• Dr Julio Friedmann, Senior Research Scholar, Center on Global Energy Policy at Columbia University

Agenda – Thursday, September 23

6.00 - 7.00 EDT	 East Asia Energy Transition: Unlocking a renewables boom Despite the rise of leading manufacturers of clean technology products, East Asian markets, such as the South Korea and Taiwanese markets, have historically been the lowest users of green energy among developed countries. Yet this year has seen a huge shift – nations unveiling net zero carbon commitments, interest in market reform, green growth strategies and attracting record-breaking investments that rival seasoned renewable energy market leaders, such as China. Is East Asia realizing it's potential to be a global clean energy powerhouse? This event will cover: The direction and pace of East Asia's energy transition and regional investment trends Leaders' plans to turn climate pledges into energy sector action The continued need to make private investment easier – through improved, stable regulatory frameworks The importance of renewables for countries remaining competitive, stimulating economic growth and phasing out coal The role of business, regional governments and wider society
Speakers	 Matthias Bausenwein, President, Ørsted Asia Pacific Katherine Dixon, Chief Counsellor, Transitions & Partnerships, International Energy Agency (IEA) Aleksandra Klassen, Senior Impact Manager RE100, Climate Group Kahori Miyake, Co-Chairman, Japan Climate Leaders' Partnerships (JCLP) & CSO, AEON Co., Ltd. Ken O'Flaherty, COP26 Regional Ambassador to Asia-Pacific, UK COP26 Unit Yang Seung-Jo, Governor of Chungnam Leo Wirawan, Senior Lead, Energy Strategy & Global Infrastructure, Google Yang Seung-ho, Assistant VP, Head of Energy Strategy Team, KEPCO
7.00 - 7.30 EDT	Networking – East Asia Energy Transition Network with your peers and debate the important topics that were raised in the previous session.
7.30 - 8.45 EDT	 India's Road To COP26: The power of influence to mobilize business action This event will bring together critical influencers from government, corporate and wider society to examine how Indian businesses can take greater climate action. As the world's third-largest carbon emitter, India has a pivotal role to play in the global response to the climate emergency and the corporate community will be instrumental in this journey. More businesses in India are demonstrating their readiness to lead and invest. But far more still need to raise their ambition. Bringing together prominent figures in Indian business, policy and activism, we'll discuss how best to influence Indian corporates to take up the huge opportunities now available in renewables, electric vehicles and efficient, decarbonized industry.
